### 4. FIRST AID MEASURES

Description of necessary measures according to routes of exposure

<b>Swallowed</b>	If swallowed, DO NOT induce vomiting. Keep at rest. Seek immediate medical attention.
<b>Eye</b>	Flush eyes with large amounts of water until irritation subsides. Seek immediate medical attention
<b>Skin</b>	Flush area with large amounts of water and wash area with soap if available. Remove contaminated clothing, including shoe and launder before reuse. Seek immediate medical attention.
<b>Inhaled</b>	Using proper respiratory protection, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest. Seek immediate medical attention.
<b>Advice to Doctor</b>	Treating according to symptoms. Avoid gastric lavage: risk of aspiration of product to the lungs with the potential to cause chemical pneumonitis.
<b>Medical Conditions</b>	No Information available on medical conditions aggravated by exposure to this product. Carcinogenicity: SWA: No significant ingredient is classified as carcinogenic by SWA. ### 5. FIRE FIGHTING MEASURES

<b>General Measures</b>	Cool containers with water until well after fire is out. Keep unauthorized personnel out. Do not access if the tank is on fire. Keep containers cool with water spray. Vapor or gas is burned at distant ignition sources can be spread quickly.
<b>Flammability Conditions</b>	Product is a Combustible Liquid
<b>Extinguishing Media</b>	Suitable extinguishing media are carbon dioxide, dry chemical, regular foam. Alcohol resistant foam is the preferred firefighting medium but, if it is not available normal foam can be used. Try to contain spills, minimise spillage entering drains or water courses. Cool closed, undamaged containers exposed to fire with water spray.  Avoid use of water jet for extinguishing.
<b>Fire &amp; Explosion Hazard</b>	Due to extreme low flash point, irrigating fire extinguishing may be less effective when put out a fire.
<b>Hazard Products of Combustion</b>	Carbon Dioxide and carbon monoxide.
<b>Special Fire Instructions</b>	Clear fire area of all non-emergency personnel. Stay upwind. Keep out of low areas. Eliminate ignition sources. Move fire exposed containers from fire area if it can be done without risk. Do NOT allow firefighting water to reach waterways, drains or sewers. Store firefighting water for treatment.

<b>Personal Protective Equipment</b>	Fire fighters should wear a positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots and gloves) or chemical splash suit. Clear fire area of all Non-emergency personnel. Stay upwind. Keep out of low areas.
<b>Flash Point</b>	>94 °C
<b>Lower Explosion Limit</b>	0.6 %
<b>Upper Explosion Limit</b>	4.9%
<b>Auto Ignition Temperature</b>	>200 °C

## 6. ACCIDENTAL RELEASE MEASURES

<b>General Response Procedure</b>	<p>Personnel involved in the clean-up should wear full protective clothing as listed in section 8. Eliminate all sources of ignition. Evacuate all unnecessary personnel. Increase ventilation. Stop leak if safe to do so.</p> <p>Avoid walking through spilled product as it may be slippery. Do not allow product to reach drains, sewers or waterways. If product does enter a waterway, advise the Environmental Protection Authority or your local Waste Authority.</p> <p>Use clean, non-sparking tools and equipment</p>
<b>Clean Up Procedures</b>	<p><b>Major Land Spill:</b> Eliminate sources of ignition. Warn occupants of downwind areas of possible fire and explosion hazard. Prevent liquid from entering sewers, watercourses, or low-lying areas. Keep the public away from the area. Shut off the source of the spill if possible and safe to do so. Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimise the effect on the ground water. Contain the spilled liquid with sand or earth. Recover by pumping – use explosion proof pump or hand pump – or with a suitable absorbent material. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. See “First Aid Measures” and “Stability and Reactivity”</p> <p><b>Major Water Spill:</b> Eliminate any sources of ignition. Warn occupants and shipping in downwind areas of possible fire and explosion hazard. Notify the port or relevant authority and keep the public away from the area. Shut off the source of the spill if possible and safe to do so. Confine the spill if possible. Remove the product from the surface by skimming or with suitable absorbent material. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. See “First Aid Measures” and “Stability and Reactivity”.</p>
<b>Containment</b>	Stop leak if safe to do so.
<b>Enviro Precautionary Measures</b>	Prevent runoff and contact with waterways, drains or sewers. If large amounts have been spilled inform the relevant authorities.
<b>Evacuation Criteria</b>	Evacuate all unnecessary personnel.
<b>Personal Precautionary Measures</b>	Personnel involved in the clean-up should wear full protective clothing as listed in section 8.

## 7. HANDLING AND STORAGE

<b>Handling</b>	This product is combustible. Do not open near open flame, sources of heat or ignition. No smoking. Keep container closed. Handle containers with care. Open slowly to control possible pressure release. Material will accumulate static charge. Use grounding leads to avoid discharge (electrical spark).
<b>Storage</b>	Store in a cool, dry, well-ventilated area. Keep containers tightly closed when not in use. Inspect regularly for deficiencies such as damage or leaks. This product will fuel a fire in progress. Protect against physical damage. Store away from incompatible materials as listed in section 10. This product is a Scheduled Poison. Observe all relevant regulations regarding sale, transport and storage of this schedule of poison. Check packaging - there may be further storage instructions on the label. This product is classified as a 'C1' Combustible Liquid for the purpose of storage and handling in accordance with the requirements of AS1940.
<b>Container</b>	Store in original packaging as approved by manufacturer.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<b>General</b>	The time weighted average concentration (TWA) for this product is: 1200 mg/m <sup>3</sup> (152 ppm), which means the highest allowable exposure concentration in an eight-hour day for a five-day working week. The short-term exposure limit (STEL) is: None specified; consider 5 g/m <sup>3</sup> , which is the maximum allowable exposure concentration at any time.
<b>Exposure Limits</b>	No Data Available
<b>Biological Limits</b>	No information available on biological limit values for this product.
<b>Engineering Measures</b>	A system of local and/or general exhaust is recommended to keep employee exposures above the Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. The use of local exhaust ventilation is recommended to control emissions near the source.
<b>Personal Protection Equip</b>	RESPIRATOR: Wear a respirator with suitable filter for organic gases and vapours (Type A) if engineering controls are inadequate (AS1715/1716). EYES: Chemical goggles to prevent splashing in the eyes (AS1336/1337). HANDS: Wear PVC, Viton, Nitrile gloves (AS2161). CLOTHING: Chemical-resistant coveralls and safety footwear (AS3765/2210).
